PROFILE

Detail-oriented Computer Science student and **Full-Stack Bubble Develope**r with hands-on experience building, testing, and deploying complete web applications. Skilled at converting Figma designs into responsive, scalable products and known for a strong eye for UI/UX. **Experienced with Bubble apps**, API and **webhook integrations**, and performance optimization. Passionate about fast execution, clean design, and creating user-focused, high-impact products in fast-moving, product-driven teams.

EDUCATION

Morgan International College, Kathmandu (Affiliated with Tribhuvan University, Nepal)
Bachelor's in Information management | 2019 – 2024
Coursework includes: Software Engineering, Database Systems, Web Development, Project Management.

EXPERIENCE

Full Stack Bubble Developer | Z Studioo | Apr 2024 – Nov 2025 | Remote

- Built and launched powerful web applications from the ground up using the **Bubble.io** platform, taking real ownership of product logic and functionality.
- Translated Figma prototypes into fully responsive, production-quality interfaces.
- Designed scalable database structures, custom states, reusable components, and workflow logic.
- Collaborated closely with UI/UX designers to convert Figma prototypes into fully responsive and interactive applications.
- Developed reusable components, managed custom states, and built complex backend workflows to optimize application performance.
- Integrated third-party tools and external APIs (REST, JSON) to extend application functionality. Conducted thorough testing, debugging, and troubleshooting to ensure application quality, reliability, and scalability.

Key Applications Delivered in (Bubble.io): Played a lead / associate development role in creating and launching:

Footygpt (**footygpt.com**): An AI Football Assistant. https://footygpt.com/

Clockitup(app.clockitup.io): A Time Tracking and attendance management application. https://app.clockitup.io/

Calsets (**app.bookslot.io**): An appointment booker application with custom admin dashboard. https://app.bookslot.io/version-test/

ChatGPT Clone: ChatGPT clone using Open AI API built on bubble.io. https://openaichatgpt-clone.bubbleapps.io/version-test/app

Marketplace Works: (**3+ Internal Projects**).

Junior Technical Editor | Tech Central | May 2022 – Jan 2023 | On-Site
- Proofread, revised, and edit technical documents to ensure clarity and precision.
- Collaborated with technical writers to maintain factual accuracy, including dates and statistics
- Designed featured images to enhance the visual appeal of articles.

ACADEMIC PROJECT

Ecommerce Website: Designed and developed with **MERN Stack**. 🔗 https://ecommerce-with-mern-phi.vercel.app/

Doctor Appointment: Built a responsive doctor appointment booker dashboard for managing appointments. https://mern-doctor-appointment-frontend-xvl4.onrender.com/

TECHNIC SKILLS

Bubble.io: Workflows, Conditionals, Data Types, Reusable Components, Responsive Design, API Integration, Database Optimization.

WordPress: Avada, Elementor, ACF Pro, SEO (All in One SEO/ Yoast SEO).

Programming Languages: Node JS/ JS (React.js, Express.js, Next.js),
Java

Deployment: Vercel, GitHub, Cloud Hosting.

API & Integrations: Stripe, SendGrid, Webhooks (real-time updates), AI Integration (Open AI / Gemini API).

Web Fundamentals: HTML, CSS, JavaScript.

Tools: GitHub, Figma, REST APIs, JSON, Google Search Console.

SOFT SKILLS

Problem-Solving • Communication • Team Collaboration • Time Management • Remote Work Adaptability
